

## **ADHESIVES**

Acoustiblok™ is a very unique product. Most non solvent adhesives seem to work on Acoustiblok™ initially, but after a short period of time they lose their bond. The time varies from a few days to a few weeks on most. Included in those that will not permanently bond is "liquid nails", silicon & regular contact cement, duct tape, foil AC tape.

After extensive testing & experience, the following is recommended: (Because of the obscurity of the best ones they may be purchased through us, if you cannot find them locally.) Our price to you is probably significantly less than the others on the open market. While we can relate to you, our experience with these adhesives (not manufactured by us) we extend no warranty or guarantee, express or implied, and will assume no liabilities involving these adhesives. Each should be used in accordance with the manufacturers specific directions.

### **3M 5200 MARINE ADHESIVE SEALANT**

Bonds Acoustiblok™ to itself, wood, fiberglass, and most other surfaces. Complete curing approximately 7 days (see manufacturer's specifications). Clean up is difficult.

Available through Marine supply company or adhesive distributors  
Average price - \$12.97 per 10 oz. Tube (which is \$38.00 for 29 oz.)

### **IA 171 FAST CURE MASTIC (not a contact cement)**

Waterproof, will bond Acoustiblok™ to itself, wood, metal and most other surfaces. Must hold in place while curing, very fast depending on temperature and humidity. Very long lasting & very strong, easy to use.

Available through Acoustiblok™  
Cost per 29 oz. Tube (FOB Tampa, Florida)

1 to 4	\$29.95
5 to 20	\$23.95
20 & up	\$18.95
